Summary

ML Engineer at Tryolabs building and deploying production ML systems. Telecommunications Systems Engineer (UdelaR) focused on signal processing and information theory; experience teaching programming and researching DNA storage.

Experience

Tryolabs, Machine Learning Engineer — Montevideo, Uruguay, Oct 2024 – Present

- Consulting and building production ML systems; end-to-end model training, evaluation, and deployment.

UdelaR, School of Engineering (InCo), Teaching and Research Assistant — Montevideo, Uruguay, Feb 2023 – Feb 2025

- Taught Programming 1/2; assisted research in the Information Theory Group (DNA storage).

Eagerworks, Junior AI Developer — Montevideo, Uruguay, Feb 2024 – Oct 2024

- Led backend for Docshunter, a document management and generation platform.

Education

B.Sc. **School of Engineering (UdelaR)**, Telecommunication Systems Engineering, Montevideo — Mar 2019 – Jun 2025

- Specialization: Signal Processing & Machine Learning; Thesis: Time Series Anomaly Detection with GNNs (GraGOD)

Certificate **Studio Cambridge**, Advanced English Course, Cambridge, UK — Jan 2018

Technologies

ML/DS: Python (Keras, TensorFlow, scikit-learn, Pandas, NumPy, LangChain)

Systems: C/C++, C#, SQL, Linux; OOP; networking, databases, operating systems

Languages: Spanish (native), English (C2, 2019), German (B1 in progress)
